

# Performance Surfaces

## Designed for Healthcare Spaces

Great design is more than just aesthetics — it means creating spaces that support well-being. In healthcare, your material choices make a difference for patient comfort, staff wellness, and the overall perception of care.

That's why the RX Collection was developed for healthcare-ready surfaces across multiple product types, built without compromise.

### Surfaces That Put People First

#### Cleaner Spaces, Less Effort

Heat-weldable sheet options like Infinity Rx simplify sanitation and reduce downtime, supporting stricter infection-control standards.

#### Calmer Environments

Plank options like Valera RXT deliver proven acoustic control, helping create quieter corridors, waiting areas, and treatment spaces.

#### Hygiene You Can Count On

With AssurGrip Rx, slip-resistant safety meets healthcare-grade cleanability, reducing risks while supporting healthier spaces.

#### Floors That Give Back

Leveraging patented itsTRU™ technology, RX surfaces absorb shock and return energy with every step, easing strain for caregivers during long shifts.

#### Support Where It Matters Most

From resident rooms to treatment areas, ergonomic comfort helps reduce fatigue and enhances the perception of care.

### The RX Collection at a Glance

A portfolio built to cover every space in a healthcare facility:

- **[NEW]** Plank solutions like Valera RXT for high-traffic corridors and waiting areas.
- **[NEW]** Safety surfaces like AssurGrip RX for wet or transitional zones.
- Resilient sheet goods like Infinity, Cosmos, Nada, Crossings, Forest, Strait, and Aurora for patient rooms, resident spaces, and common areas.

### The Look You Want, The Confidence You Need

You don't have to choose between function and form. The Rx Collection offers a range of finishes and formats, realistic material visuals, and sustainable options, so you can design with confidence and style.
