

# Origins

Can a floor do more?  
Yes.

Since 1871, Ecore has been transforming reclaimed materials into performance surfaces that make people's lives better. What started with simple cork closures has evolved into a diverse portfolio of products solving complex problems in applications ranging from playgrounds, weight rooms, and turf fields to hospitals, hotels, and retail environments. We are driven everyday by a simple question, "Can a floor do more?" At Ecore, we believe the answer is "YES." We are building our company and the products we offer based on the simple notion that floors should elevate beyond current expectations. Our energy is focused on the interaction between people

and the surface. We engineer performance well beyond industry standards related to acoustics, ergonomics, and safety. Harvesting the unique power from a myriad of waste streams, Ecore creates products that align—substantial force reduction with a balanced amount of energy restitution to create dynamic surfaces that are tailored to the individual and the application.

People will fall... we will be there to catch them! Professionals will overwork their bodies... we will soften the blow! Footfall sounds will keep someone awake... we will quiet the noise!

## Origins

Origins integrates our past with our present: adding cork to vulcanized composition rubber, creating beautiful surfaces where durability meets timeless design.

### Markets

- Corporate
- Education
- Institutional
- Retail

### Benefits

- Durable
- Slip Resistant
- Offers better acoustic properties than traditional resilient surfaces
- Endless design options

### Dimensions

3.2mm Tiles  
12" (30.5cm) x 24" (61cm)
